PROJECTS

<u>Dhairya</u> 🔗
- Developed Dhairya, an one in all service to help Gym Owners tracks their users. The service helps them monitor their revenue, their gyms and the duration of the membership of users. It helps them save around 70-80% time on a regular basis.
- For Users, this website enable them to monitor their attendance to gym, their weight using ChartJs, their targets, their calories and their workout plans. Subsequently the website also helps them find gyms near them and enroll directly saving them a lot of hassle and around 80-90% of their time.
- Used Cloudinary to save photos of gyms as well as Users, Cron Job to take care of membership details and Bcrypt and JWT to ensure safety of Users and ensure smooth authentication.

Tech Used : Javascript, React Js, Node Js, MongoDB, Cloudinary, Cron Job, Bcrypt, JWT

<u>Elevance</u> 🔗

- Developed Elevance, a website to help Freshers as well as experienced people of any field to come and find jobs on the basis of their resume.
- Elevance uses Gemini Model to parse through your resume and on the basis of your skills and technologies you know, it provides you listed jobs which saves around 70-80% time. Moreover Elevance also helps you prepare for different Interview rounds keeping your resume and job profiles in mind.
- The embedded Monaco Coding Editor also helps you to prepare for DSA Round Questions and the speech to text method enables you to get a real-time feel of an interview.

Tech Used : Typescript, React Js, Node Js, Monaco, Gemini, Speech-To-Text, Adzuna API, Puppeteer
